Maplesoft Product Announcements

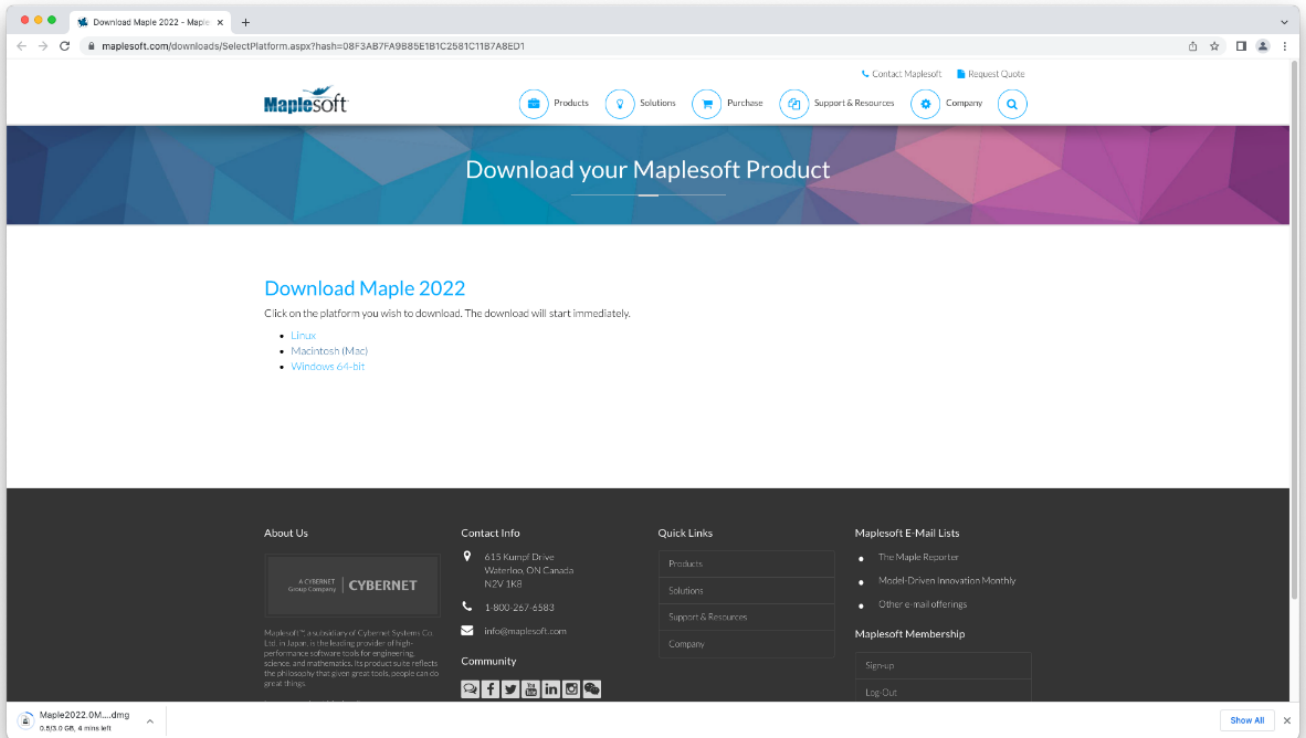

Maplesoft has a double opt-in policy. You will be sent an email asking you to confirm your subscription.

Note: The first time that Maple is launched, MacOS may request accessibility permissions. Please Open System Preferences, unlock Accessibility settings, and grant permissions to Maple 2022:

STANDALONE INSTALLATION - LINUX

1. Click the link we have provided you to download the installer file. Select “Linux”. Save the file:

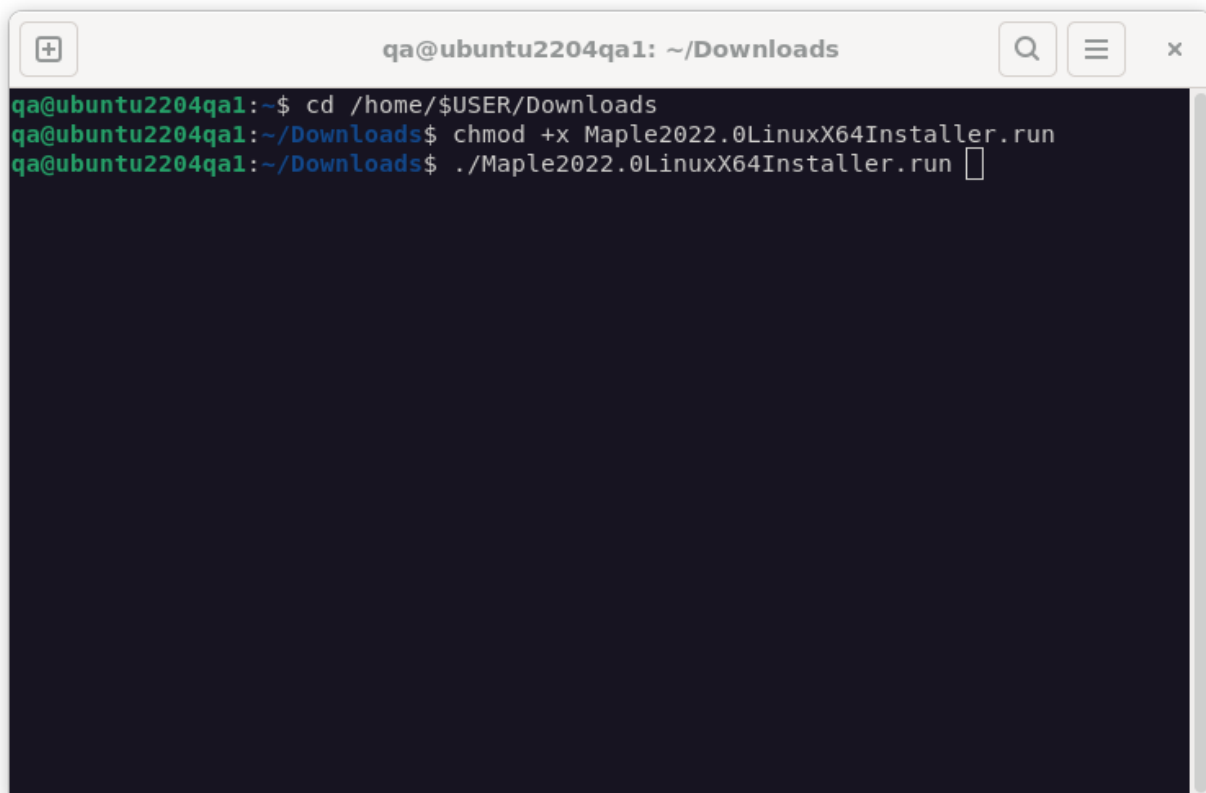

Download Maple 2022

Click on the platform you wish to download. The download will start immediately.

- Linux
- Macintosh (Mac)
- Windows 64-bit

2. Once the installer file has downloaded, open up the Terminal. Change the directory to where the installation file was downloaded to. The default is **cd /home/\$USER/Downloads**
3. Use “chmod” to change access permissions to the installer file by **chmod +x Maple2022.0LinuxX64Installer.run**
Then, run the file with **./Maple2022.0LinuxX64Installer.run**

A terminal window titled "qa@ubuntu2204qa1: ~/Downloads". The terminal shows the following commands and their outputs:

```
qa@ubuntu2204qa1:~$ cd /home/$USER/Downloads
qa@ubuntu2204qa1:~/Downloads$ chmod +x Maple2022.0LinuxX64Installer.run
qa@ubuntu2204qa1:~/Downloads$ ./Maple2022.0LinuxX64Installer.run
```

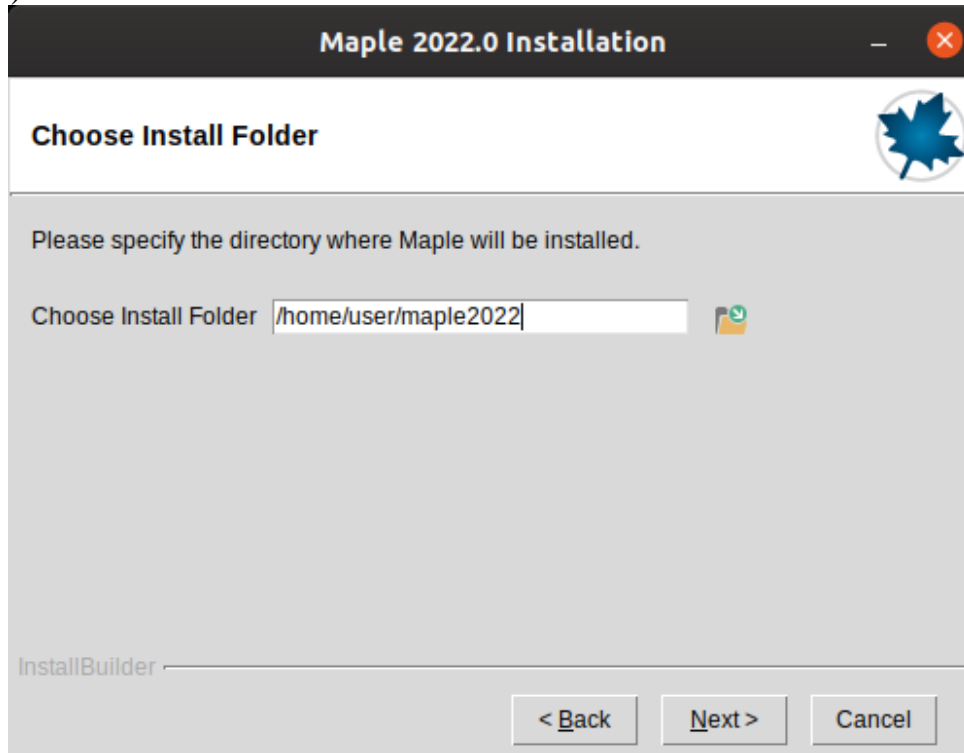

4. The installer will now launch.

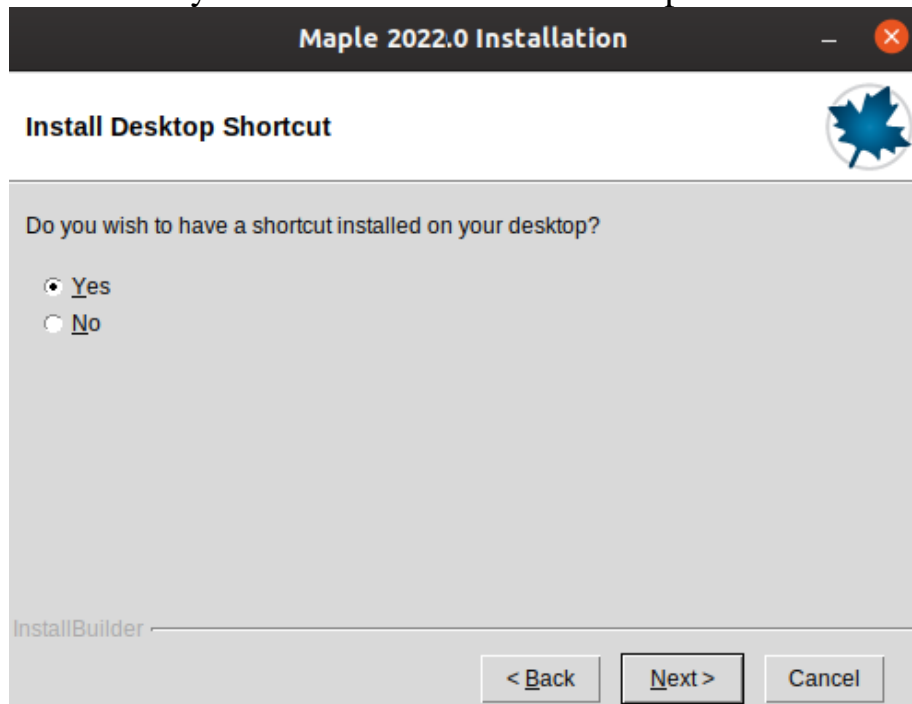

5. Accept the license agreement:

6. Choose the path to install Maple. A default path is already chosen ("user" represents your username):

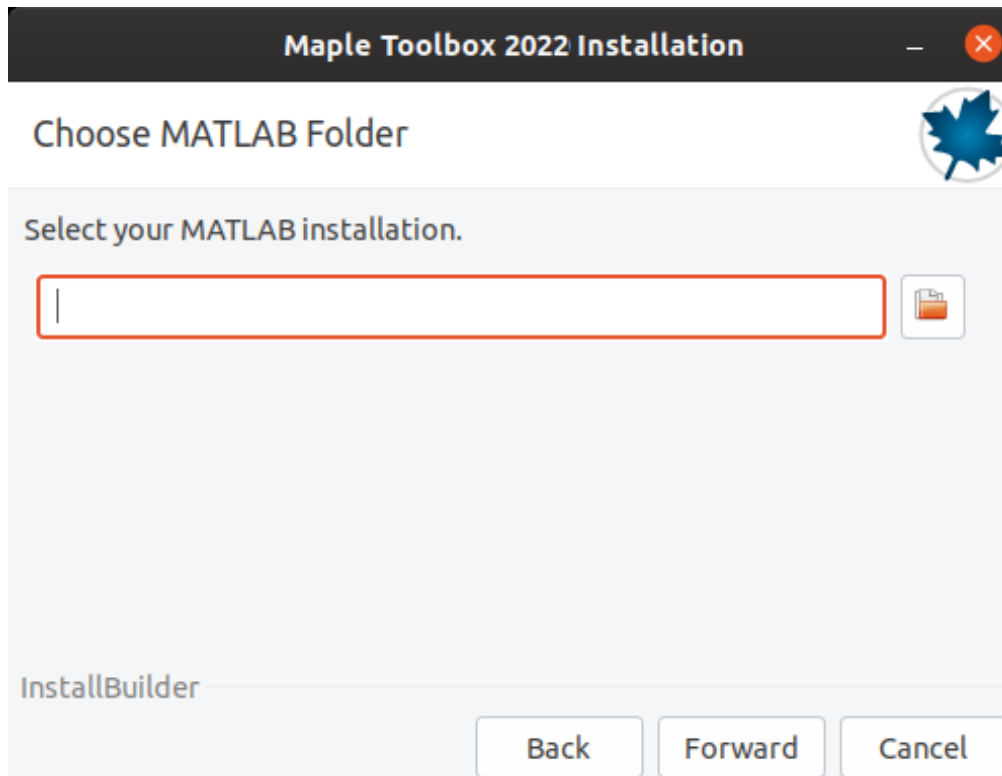

7. Choose whether or not you would like to have a desktop shortcut:

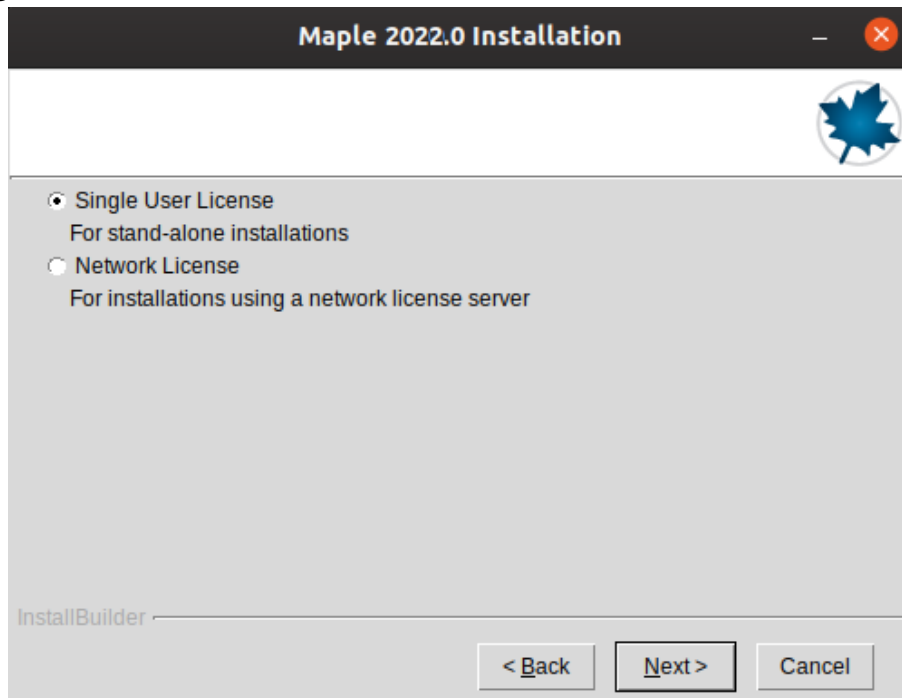

8. Choose if you want Maple 2022 to be the default application for Maple worksheets (only if you have previous versions installed).

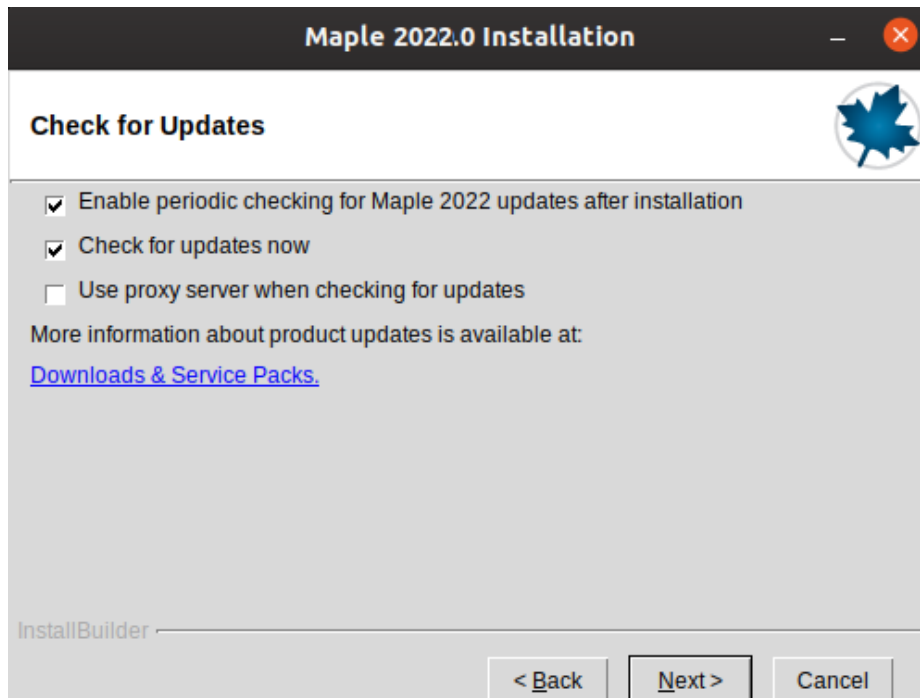

9. Choose if you would like to link Maple with MATLAB. The supported versions with Maple 2022 are MATLAB 2021b, 2021a and 2020b

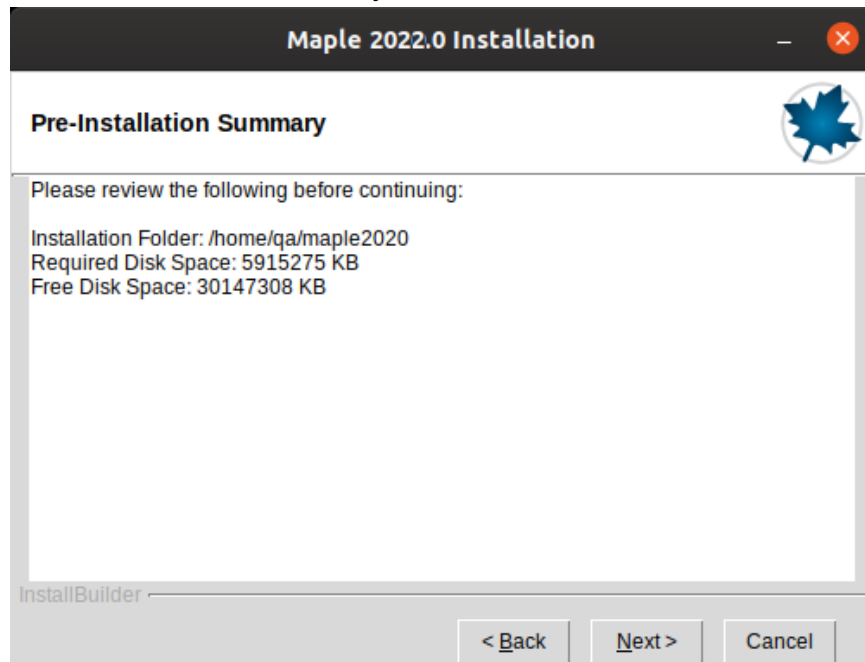

10.Keep “Single User License” selected:

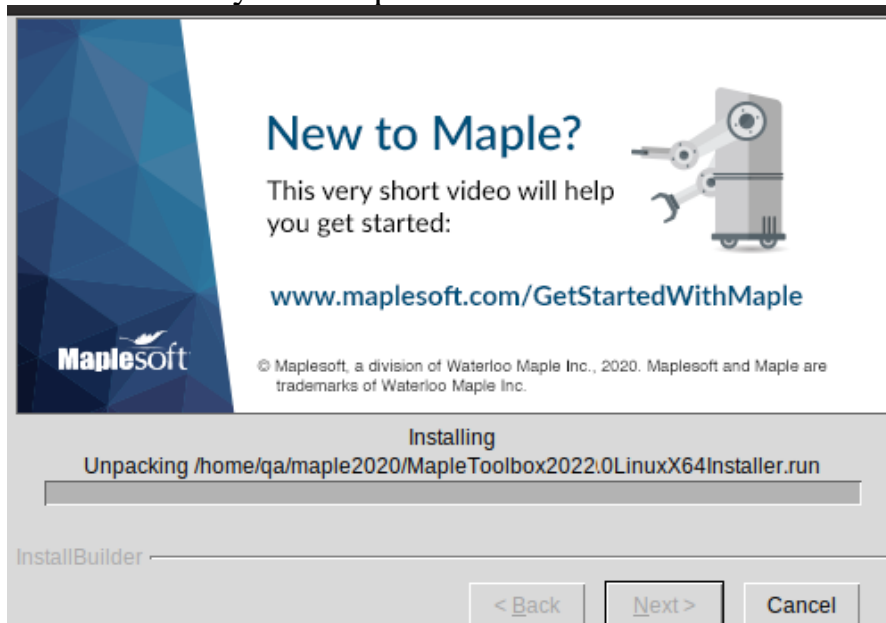

11.Choose whether you would like the installer to check for updates available to your Maple 2022 installation:

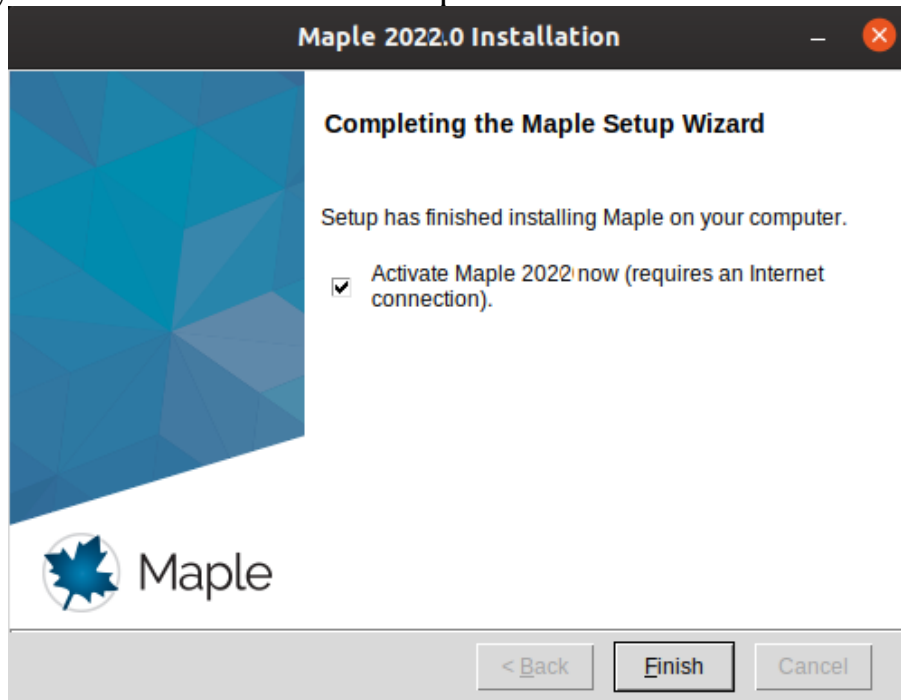

12. Review the Pre-Installation Summary:

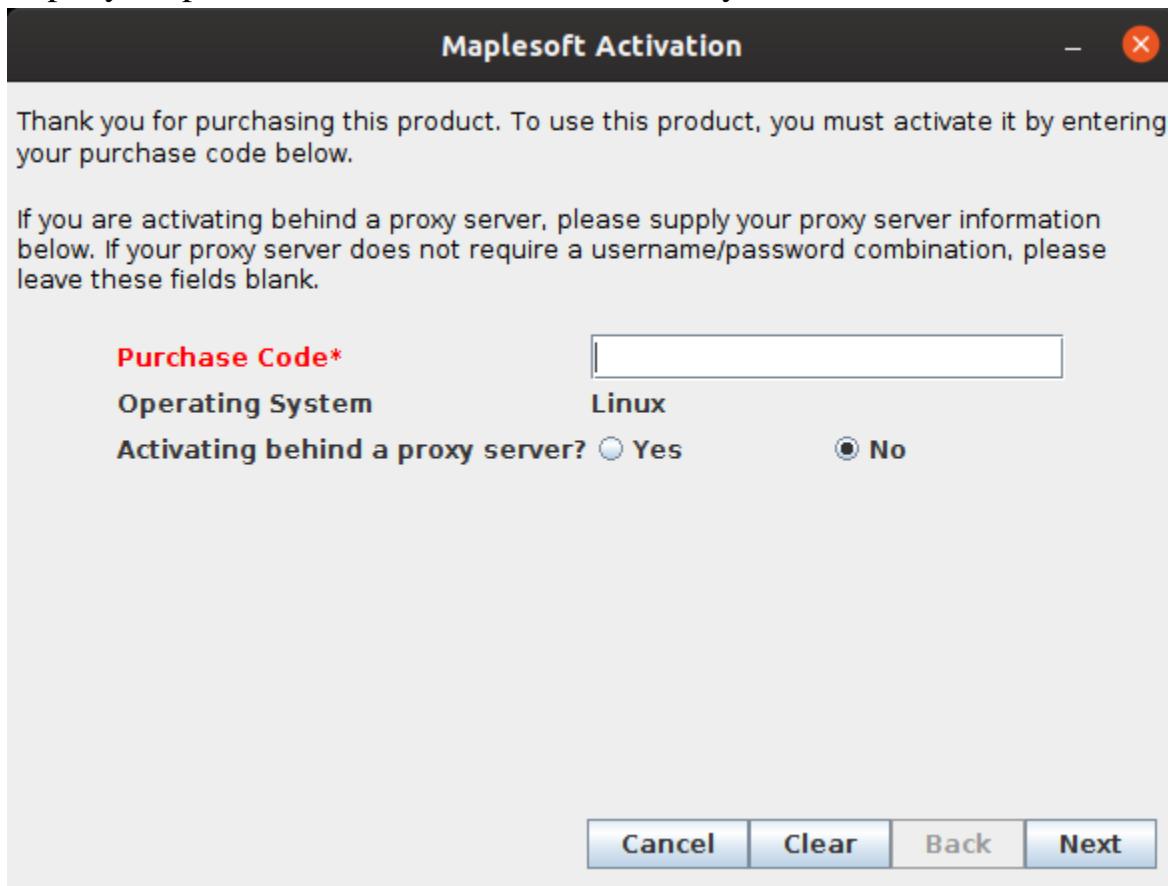

13. Maple 2022 will install on your computer:

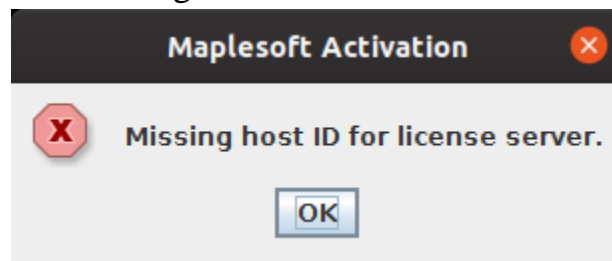

14. Decide if you would like to activate Maple 2022 now:

15. Input your purchase code and then the necessary information to activate:

Note: If you get the error "Missing host ID for license server."

You may be missing some 32-bit compatibility libraries. You can find instructions on this in our FAQ here:

<https://faq.maplesoft.com/s/article/Maple-is-not-activating-on-64-bit-Linux>

16. Input the necessary information to activate:

A screenshot of the "Maplesoft Activation" form. The title bar says "Maplesoft Activation". Below the title bar, it says "Fields required for activation are marked in red*." The form contains several fields: "Purchase Code*" with a masked value "XXXXXXXXXXXXXXXXXX", "First Name*", "Last Name*", and "Email address*", all of which are marked with red asterisks. Below these is a dropdown menu for "Operating System" with "Linux" selected. A paragraph of text explains that contact information is collected for activation and customer service. Below this is a link to "Learn more about Maplesoft's Privacy and Data Protection Policy." There are two checkboxes: "I consent to the collection of information as described above." (checked) and "Maplesoft Product Announcements" (checked). At the bottom, there is a note about a double opt-in policy and four buttons: "Cancel", "Clear", "Back", and "Next".

Note: If the first time you start Maple on Linux it freezes on the splash screen you may be missing openjfx (which allows Java graphics). This can be fixed by running

```
sudo apt-get install openjfx
```

in the terminal.
